Brief Summary:

A top-five computer science graduate from An-Najah National University, Skilled in building and testing modern web and mobile applications with FastAPI, Next.js, Flutter. Experienced in API testing and validation, and CI/CD practices using GitHub Actions. Hands-on with ticketing tools like Jira and Trello, and familiar with AWS/Linux deployments. Strong problem-solving and troubleshooting abilities, complemented by customer support experience and effective collaboration with cross-functional teams. Adaptable, detail-oriented, and committed to delivering reliable solutions in fast-paced environments.

Education

An-Najah National University — *2020 – 2024*
BS in Computer Science — *Nablus, Palestine*
- GPA: 3.24/4.0 ([Certificate ↗])

Attil secondary boys school — *2019 – 2020*
High School Degree — *Tulkarem, Palestine*

Experience and Internships

Full-Stack Developer & API Test Engineer at *XarioTech* — *Remote* — *03/2025 – 06/2025*
Contributed to leading and developing full-stack web applications using FastAPI and Next.js. Designed and optimized PostgreSQL databases, integrated OpenAI APIs to build a backend recommendation system, and implemented Redis caching for performance. Created automated API tests with Pytest and maintained GitHub Actions CI/CD pipelines for reliable releases. Deployed and maintained applications on Amazon Lightsail (AWS), including Linux server configuration, monitoring, and troubleshooting.

Software Quality Assurance Internship at *Xngage* — *Nablus, Palestine* — *02/2024 – 05/2024*
Assisted in end-to-end QA processes, including creating and executing test cases, writing detailed bug reports, and supporting regression and functional testing. Gained exposure to agile ceremonies, defect management, and collaboration with developers to ensure timely bug fixes. Strengthened foundations in testing methodologies and QA best practices.

Flutter Diploma at *Knowledge Academy* — *Nablus, Palestine* — *05/2023 – 11/2023*
Gained hands-on experience in Flutter development, including widgets, state management, Firebase integration (Auth, Firestore, Image Upload, Push Notifications), animations, local databases (Sqflite), HTTP requests (Http/Dio), native code, and app publishing. Worked with maps, voice recorder, and player packages.

Skills

- **Programming & Development:** Python, JavaScript/TypeScript, OOP, SQL/NoSQL, FastAPI, Next JS, Flutter.
- **DevOps & Cloud:** Git, GitHub, GitHub Actions, CI/CD pipelines, Docker, Deployment Amazon Lightsail (AWS), system monitoring.
- **Core Strengths:** Debugging, Troubleshooting, Problem Solving, Attention to Detail, Leadership, Project Management, Teamwork, Collaboration, Self-learning, Organization, Time Management.

Languages:

Arabic: Native   **English:** Very good ([Certificate ↗])
